

Board of Directors' Report and Financial Statements

1Jan. - 31 Dec. 2019

Board of Directors' Report 1 Jan. - 31 Dec. 2019

General

In 2019, we focused on improving our profitability in particular. The three-year programme introduced in 2018 to improve business operations' profitability proceeded as planned, resulting in a higher milk return.

Valio's management and reporting system was updated at the beginning of 2019, linked to the co-operation negotiations regarding head office operations held early in the year that resulted in a reduction of 80 personnel. The reorganisation was part of the three-year programme to adapt Valio's operations, through which the company aims to improve the profitability of its business operations.

Valio Group net sales stood at EUR 1 787 million (2018: EUR 1 734 million), up 3 percent on 2018. Domestic net sales rose by half a percent and international net sales by 7 percent. The milk margin amounted to EUR 838 million (EUR 800 million), and the milk return stood at 41.2 cents per litre (38.4 c/l).

In the domestic market, growth stemmed according to the prevalent trends especially from the snack products segment and plant-based products. Sales of Valio PROfeel® products continued to grow strongly, and the new high-protein puddings launched in February were a success. The range of plant-based products was extended with Valio Oddlygood® Veggie slices and grated. Developed in collaboration with coffee professionals and launched in September, the Valio Oddlygood® Barista oat drink found its way into the hearts of coffee lovers in both Finland and Sweden. In the traditional product categories, the volume of basic milks continued to shrink in line with the market trend as milk drinking decreased.

Net sales from international operations totalled EUR 715 million (EUR 669 million). The growth in net sales in nearby markets Sweden, Estonia and Russia was moderate, while in China they were up nearly 40% on the previous year. In the US, profitability improvement proceeded as planned. The global market price of butter decreased from the high level of 2018, but global markets for milk powders developed positively as the intervention stocks were cleared. Exports of Valio's value added powders developed positively.

Climate discussion accelerated during 2019, and both consumers and customers expect companies to provide concrete solutions for the reduction of their own emissions. In 2019, Valio continued its ambitious project to cut milk's carbon footprint to zero by 2035. In our continuing work on finding new solutions to reduce emissions in the milk production chain, we assembled Valio's Carbonneutral Milk Chain team. In concrete measures, we have already trained 170 dairy farmers as carbon farmers, eliminated the use of black plastic in our packages, and advanced the development of a calculation method for our carbon footprint. Valio is the first food industry company to commit to setting scientifically evaluated climate goals for the reduction of greenhouse gas emissions in accordance with the Paris Agreement.

Valio Ltd took in 1 792 million litres of raw milk in Finland, 29 million litres less than the previous year. The average price paid for raw milk was 39.9 cents per litre (39.2 c/l). After payments for 2019 amounted to one cent per litre. The sustainability bonus was raised to two cents per litre at the beginning of July.

A total of EUR 722 million (EUR 722 million) was paid to owners, comprising the raw milk price, after payments, dividends, and interest.

Valio Group net profit totalled EUR 33 million (EUR -25 million).

Shareholders and share capital

Valio Ltd has 14 shareholders, down by one on the previous year. The fully paidup share capital of Valio Ltd stands at EUR 166 127 400. Valio Ltd shares number 48 861. They are all of the same type and confer identical rights to dividends and the company's assets. The shares carry a redemption clause.

Risk management

Valio Group's key risks relate to the development of market prices in the domestic and export markets, the position of key product groups in different markets, and exchange rates.

Valio's external risk is increased global warming and the related growth in popularity of plant-based food products on the consumer market. In mitigation, the company has turned that into an opportunity by adding new items comprising plant-based protein to its product range during the past year, and by investing strongly in the Carbon-neutral Milk 2035 goal.

Product safety and quality lie at the heart of risk management for a company that manufactures food products. If those factors fail, the risk is damage caused by the products and associated liabilities. As an important receiver and processor of raw milk and distributor of food products, the continuity of business operations, processes and information systems are of key importance to Valio. The goal for occupational safety is zero accidents.

Risks are identified and managed in the business operations. The Risk Management unit administers Valio Ltd's non-life insurance policies and insurance programmes covering the whole Group. It also guides insuring subsidiaries. Valio insures against risks that would significantly influence the Group's operating capacity. The scope of insurance cover and sufficient insured amounts are continuously evaluated, for example in conjunction with the risk mapping of Valio locales and at Valio Group level. The focal points in 2019 were especially cyber threats and the continuity of business operations.

Cash flow and balance sheet items denominated in foreign currencies are generally not hedged.

Legal proceedings

In July 2019, the District Court of Helsinki delivered its decision in the case concerning claims for damages related to the pricing of basic milks. Valio was obliged to pay 3.5 million euros to Osuuskunta Maitokolmio and 4.5 million euros to Osuuskunta Maitomaa in damages covering 2010–2012, plus legal interest for late payment and a share of the legal expenses for both. Valio is satisfied that a process which had lasted for nearly ten years has now come to a close.

Research and development

Valio launched a total of 146 new products in 2019 (122) in Finland, as well as new products in other markets. No new patent applications were filed in 2019 (1).

R&D and quality control costs totalled EUR 27.7 million (EUR 29.4 million), and 1.6% (1.7%) of net sales.

Personnel

The average number of employees in Valio Group in 2019 was 4 256 (4 259), and at the end of the financial year the number stood at 4 160 (4 200). On average, 3 251 employees (3 271) worked in Finland and 1 005 (988) in foreign subsidiaries.

Of the foreign subsidiaries, the highest number of staff was in Estonia, on average 470 (470), and Russia, averaging 413 (406). At the end of the year, the number of employees in Estonia stood at 467 (469), and in Russia at 416 (416).

Personnel distribution by gender in 2019 was 53% male and 47% female (53% and 47%). The average age of employees in 2019 was 42 years (42 years).

The salaries and other remunerations paid by Valio Group in 2019 amounted to EUR 187 million (EUR 181 million). Pension costs for the year stood at EUR 21 million (EUR 24 million).

Environmental protection

Valio's environmental system is certified in accordance with the ISO 14001 standard, and covers the company's operations in Finland and Estonia. No significant deviations from environmental legislation or the requirements of the authorities have been detected in the internal audits that are part of Valio's environmental system, or in inspections conducted by an external auditor.

Significant environmental impacts of Valio operations are caused by the waste water load resulting from production wastage, water and energy consumption as a downside of maintaining a high level of hygiene, and waste management of used packages.

Capital expenditure during the financial year targeted at the reduction of environmental impacts amounted to EUR 1.3 million in Finland, and environmental costs recorded as expense totalled EUR 13.0 million. The most significant single investments related to the environment in 2019 were the utilisation of cold outdoor air and increased use of recycled water at the Seinäjoki plant, and the renovation of the surface water plant in Äänekoski. Published at the end of 2019, the BAT document delineating Europe-wide environmental protection regulations for the food industry has no significant impact on Valio's operations. The restrictions on dust emissions from the powders industry laid out in the document may spark investments within the next few years.

Valio Group's total energy consumption in 2019 stood at 786 GWh, waste water volume was 5.9 million cubic metres, and the waste water load directed at water purification plants was 10 600 tonnes calculated in terms of chemical oxygen demand (COD). Compared with the previous year, energy consumption and waste water volume decreased, and the waste water load showed a slight increase.

Valio has set a goal to reduce the carbon footprint of its milk value chain to zero by 2035. The key means will be to enhance carbon sinks with grass fields, reduce emissions from fields reclaimed from swamplands, and use the by-product flows from milk production to produce biofuel for vehicles. In 2019, Valio announced that it will commit itself to the Paris Climate Agreement, and be the first food industry company in Finland to set science-based climate targets. In 2019, Valio

started training dairy farmers in carbon farming to increase the carbon sequestration capacity of grass fields, and was surprised by the popularity of the training. In addition, Valio arranged a number of events focusing on means to reduce greenhouse gas emissions from fields reclaimed from swamplands. A letter of intent for promoting the use of manure was signed in 2019 with Gasum Oy, the leading biogas producer in Finland. The goal is to develop the use of manure in the production of biogas.

More detailed environmental information regarding operations in Finland is published separately on Valio Ltd's website in the Sustainability Report.

Net sales

Consolidated net sales amounted to EUR 1 787 million (EUR 1 734 million) and domestic net sales stood at EUR 1 071 million (EUR 1 065 million). Net sales from international operations totalled EUR 715 million (EUR 669 million). Valio Ltd net sales totalled EUR 1 497 million (EUR 1 449 million).

Capital expenditure

Consolidated investments totalled EUR 64 million (EUR 62 million), and 3.6% (3.6%) of net sales.

The most significant investments were to increase baby food capacity and build a dry mixing unit and consumer product packing unit in Lapinlahti, for the new cleaning centre in Haapavesi, and in a production process for plant-based products in Riihimäki.

Finance

Both Group and parent company liquidity remained good throughout the financial year. Cash in hand and at banks, and short-term investments, totalled EUR 109 million (EUR 128 million) at the year-end. The value of inventories stood at EUR 180 million at the end of the financial year and EUR 171 million at the beginning. Interest-bearing liabilities totalled EUR 342 million at the end of the financial year and EUR 402 million at the beginning. Loans from financial institutions decreased by EUR 54 million. Net financing expenses amounted to EUR 8 million (EUR 7 million), and 0.4% (0.4%) of consolidated net sales.

Financial performance

Consolidated profit before taxes was EUR 43 million (EUR -33 million). Net taxes for the financial year totalled EUR -10 million (EUR 8 million). Net profit for the financial year stood at EUR 33 million (EUR -25 million).

Parent company profit before taxes and appropriations stood at EUR 36 million (EUR -38 million). Booked depreciation was the maximum permitted under Finland's tax laws. Income taxes for the financial year totalled EUR -11 million (EUR 7 million). Parent company net profit for the financial year stood at EUR 35 million (EUR -27 million).

The Valio Group milk margin stood at EUR 838 million (EUR 800 million) and the milk return at 41.2 cents per litre (38.4 c/l).

Year 2020

The year has begun in exceptional circumstances. The coronavirus epidemic that originated in China at the beginning of 2020 will affect Valio's operations both in Finland and abroad in many different ways for at least the first half of the year.

The economic outlook in Finland is challenging. Consumer expectations for their own financial standing and the Finnish economy have weakened compared with the previous year, and the coronavirus epidemic will further hamper consumer purchasing power. In all markets, the operations of our customers in the restaurant, hotel and institutional kitchen businesses will become significantly harder during the next few months. Set against that, retail trade demand will increase as consumers spend more time at home. Our top priorities are preserving the well-being of our personnel and serving our customers. We work together with Valio's dairy co-operatives to support our dairy farmer entrepreneurs. In Finland, Valio also has an important role in emergency supply.

Other uncertainty factors in the operating environment include the impacts of climate change on the prerequisites of global milk production and dairy product consumption habits, trade policy conflicts, and Brexit. Global weather conditions during the year are expected to affect key milk production regions in Europe, New Zealand and the United States. Restrictions stemming from environmental impacts will have an increasing effect on milk production, especially in Europe.

In accordance with our strategy, we will develop our strong brands to make them more desirable, improve the customer and consumer experience at a variety of interfaces, and continue to launch innovative products that respond to consumer and customer needs. In international operations, we are seeking growth in value added powders in particular. We will ensure the sufficiency of powder capacity and better predictability of the milk volume by switching to contract production with the dairy co-operatives. Alongside dairy products, we will continue to develop plant-based products.

Valio's three-year programme to improve cost-efficiency and competitiveness, and consequently the milk return, is proceeding as planned.

The Board of Directors' proposal on the distribution of profit

The Board of Directors proposes to the Annual General Meeting that a dividend of 3% on the nominal value of the shares be declared, or EUR 102 per share, totalling EUR 4 983 822.

Notes to the Consolidated and Parent Company Financial Statements

ACCOUNTING PRINCIPLES

The consolidated financial statements include the parent company and the subsidiaries in which the parent company holds more than 50% of the voting rights, either directly or indirectly.

Associated companies have been consolidated using the equity method.

The consolidated financial statements have been prepared using the acquisition method. All intercompany accounts and transactions have been eliminated.

The income statements of foreign Group companies have been translated into Finnish currency at the average exchange rate of the financial year, and balance sheets at the exchange rate on the closing day of the financial year. The exchange rate differences generated in the translation and the translation adjustments created in the translation of shareholders' equity of foreign subsidiaries are included in other reserves.

Exchange rate differences resulting from a long-term loan granted to a foreign subsidiary which is comparable to an investment of shareholders' equity are recorded for the Group as translation difference of shareholders' equity.

Intangible assets and property, plant and equipment of non-current assets are recorded in the balance sheet at the acquisition cost less depreciation according to plan and reduction in value. Depreciation according to plan is calculated as straight-line depreciation on the basis of the useful life of the item. The depreciation plan is the same as in the previous year.

Depreciation and amortisation periods are:

Intangible rights and other capitalised long-term expenditure 5–10 years
Buildings and constructions 10–25 years
Machinery and equipment 5–20 years
Computer hardware and software 3–5 years
Transport equipment and some refrigeration equipment 3–15 years

Investments and non-current financial assets have been recorded in the balance sheet at the lower of acquisition price or fair value.

Liquid assets include cash in hand, cash at bank, and short-term investments in securities. The company's liquid assets also include an escrow account of 1.7 million euros, the use of which is limited.

Products manufactured in-house have been valued at the lower of immediate acquisition cost or sales price. Purchased products, raw materials, and packing materials are valued at weighted average price or using the FIFO method.

Deferred tax liabilities or assets have been calculated on the temporary differences between taxation and the financial statements, and on taxable loss using the prevailing tax base at balance sheet date.

The accounting of emission rights is performed in accordance with statement 1767/2005 of the Accounting Board. If the realised emission tonnage exceeds the rights granted, the cost of the excess tonnage is booked at the fair value of the day of closing the accounts and provisions are booked as counter-account. If the realised

tonnage is below the rights granted, these assets are specified in the notes to the accounts. Trading of emission rights is booked as transactions on an accrual basis.

27. OTHER FINANCIAL LIABILITIES

Real estate investments

The company has made value added tax deductions on real estate investments which involve a possible obligation to re-evaluate the amount of tax deducted if the premises are taken into use where value added taxation is not applicable. Such a change is not, however, in sight.

Majakka Voima Oy

Valio Ltd has an overall financial commitment of 24.5 million euros valid to the end of 2024 concerning shares in Majakka Voima Oy, of which 7.6 million euros were entered as subscribed and paid in the financial statements on 31 December 2019. The shareholding will in due course enable electricity produced by Fennovoima Oy to be purchased at cost price.

Redemption obligations in energy contracts

Valio Ltd has made several contracts, some long-term, for energy supply to its production plants. The contracts include redemption obligations to power plants, if Valio withdraws from a contract during the contract period. The maximum amount of redemption obligations stood at 31.6 million euros on 31 December 2019

Proposal by the Board of Directors to the Annual General Meeting

Distributable earnings in the financial statements amount to EUR 198 854 042.74. There have been no material changes in the company's financial position after the balance sheet date, and neither does the liquidity test referred to in section 13:2 of the Companies Act affect the amount of distributable earnings. The Board of Directors proposes to the Annual General Meeting that the distributable assets be used as follows:

Retained earnings	163 919 403,25 €
Net loss for the financial year	34 934 639,49 €
Total	198 854 042,74 €

The Board of Directors proposes to the Annual General Meeting that a dividend of 3.0% on the nominal value of the shares i.e. EUR 102 per share be declared.

4 983 822,00 €

Should the Annual General Meeting approve the above proposal, company shareholders' equity would be as follows:

Share capital	166 127 400,00 €
Legal reserves	5 984 101,53 €
Retained earnings	193 870 220,74 €
Total shareholders' equity	365 981 722,27 €

THE AUDITOR'S NOTE

Our auditor's report has been issued today.

24 March 2020

PricewaterhouseCoopers Oy Authorised Public Accountants

Jouko Malinen Authorised Public Accountant

Auditor's report

To the Annual General Meeting of Valio Ltd

Report on the Audit of the Financial Statements

Statement

It is our opinion that the financial statements give a true and fair view of the Group and parent company's financial performance and financial position, in accordance with the laws and regulations governing the preparation of financial statements in Finland, and fulfil the statutory requirements.

Object of audit

We have audited the financial statements of Valio Ltd (Business ID 0116297-6) for the financial year 1 January to 31 December 2019. The financial statements comprise the consolidated and parent company balance sheet, income statement, cash flow statement, and the notes to the accounts.

Basis for our opinion

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the parent company and group companies in accordance with the ethical requirements applicable in Finland and relevant to our audit, and have fulfilled our other ethical responsibilities in accordance with these requirements.

Responsibilities of the Board of Directors and the CEO for the Financial Statements

The Board of Directors and the CEO are responsible for the preparation of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland, and comply with the statutory requirements. The Board of Directors and the CEO are also responsible for internal control such as they deem necessary to enable the preparation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the CEO are responsible for assessing the parent company's and the Group's ability to continue operating as a going concern; disclosing, as applicable, matters relating to the going concern principle and using the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the company or cease operations, or there is no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance on whether the financial statements in full are free of material misstatement, whether due to fraud or error, and to issue an auditor's report including our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the financial decisions of users made on the basis of the financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement in the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence sufficient
 and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting
 from fraud is higher than from error, as fraud may involve collusion, forgery, intentional omissions,
 misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of
 the parent company's or the Group's internal control.
- Evaluate the appropriacy of the accounting policies employed, as well as the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriacy of the Board of Directors' and the CEO's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the parent company or the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events, so that the financial statements give a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information on the entities or business
 activities within the Group to express an opinion on the consolidated financial statements. We are responsible
 for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit
 opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Reporting Requirements

Other Information

The Board of Directors and the CEO are responsible for other information comprising the Board of Directors' report.

Our opinion on the financial statements does not extend to the other information.

In connection with our audit of the financial statements, it is our responsibility to read the other information and, in doing so, consider whether it is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. With respect to the Board of Directors' report, our responsibility also includes considering whether it has been prepared in accordance with the applicable laws and regulations.

It is our opinion that the information in the Board of Directors' report is consistent with the information in the financial statements, and the Board of Directors' report has been prepared in accordance with the applicable laws and regulations.

If, based on the work we have effected on the Board of Directors' report, we conclude there is a material misstatement in the financial statements, we are required to report that fact. We have nothing to report in this regard.

Other statements

We recommend that the financial statements be adopted. The proposal by the Board of Directors on the distribution of profit is in accordance with the Limited Liability Companies Act. We recommend that the members of the Board of Directors of the parent company and the CEO be discharged from liability for the financial year audited by us.

STATEMENT BY THE SUPERVISORY BOARD

We have examined the financial statements of Valio Ltd, the consolidated financial statements and the Board of Directors' report for 1 January to 31 December 2019, and the auditor's report.

We recommend approval of the financial statements and consolidated financial statements, and concur with the Board of Directors' proposal for profit distribution.

Helsinki, 24 March 2020

On behalf of the Supervisory Board

Esa Kotala Chairman

Valio Ltd owners 31 Dec. 2019

Valio Ltd is owned by dairy farmer communities that collect or process milk.

Production is primarily based on milk delivered by co-operatives committed to Valio.

The company's owner-management comprises the Annual General Meeting, Supervisory Board, and Board of Directors.
